

Aetna’s Interoperability API Developer Portal

Upcoming Releases

*** We’re continuously working to provide new and updated functionality. The dates below are tentative and subject to change. Check the Previous Releases Tab to review functionality previously deployed. ***

Change/Enhancement Information	
Date	Description
6/4/2026	<u>Prior Authorization APIs</u> Documentation Templates and Rules (DTR) DTR API will be available in Production and Sandbox in Q4 2026.
8/18/2026	Coming September 2026 <u>Health System App Type Updates</u> The Provider System and EHR application types will be renamed to Health System - SMART and Health System – UDAP respectively. This update provides clearer differentiation between integration models and does not affect existing application access. <u>Questionnaire Improvements</u> Questionnaires for all application types will be updated with improved guidance, validation messaging, and data collection requirements to enhance the onboarding experience and reduce registration delays.
